ali050786@gmail.com

Pune, India

PROFILE

Five years as founding designer, then UX lead, on a white-label enterprise platform serving three audiences (**insurers, employers and members**) in US health insurance, from its first screen to production. Before that, a bilingual civic services platform in Dubai and an airline's consumer apps. Now bringing **AI-assisted delivery** into enterprise UX.

EXPERIENCE

Mphasis · White-label US health-insurance platform

Founding UX Designer → UX Lead
Official title: Technical
Delivery Lead
2021 – Present

The platform's first designer · led **4 designers** (hired 2) · UX sign-off on client releases · **3 live clients**

- **9 → 5 steps.** Redesigned open enrollment so “who's covered” is asked once; in production for all 3 clients. When engineering pushed back, negotiated a phased backend change they owned instead of resisted.
- **Weeks → under 24h** to theme a new client or prospect demo: three-tier tokens (insurer → employer → member) across a **120+ component** system for web, mobile web, iOS and Android.
- **1–2 weeks → 3–4 days** Jira-story turnaround with BAs (observed), after I rebuilt the design system as AI-readable skill files. Self-initiated; rolled out to my designers, then the wider org; held back from BAs so UX thinking comes before screens.
- Instituted governance: BA workshops before design, design QA on builds, human review of every AI-generated screen, and a tech-lead agreement so each component state is built once, not per page.

Blinkwiser

Independent AI product work
Lab, alongside Mphasis
2025 – Present

Where I test agentic UX patterns before they reach enterprise work. **Carousel Builder**, live with users: Plan → Execute → Reflect, rules enforced in code, every figure sourced, every edit reversible. **Video Course Builder** in beta.

Mphasis · Dubai Municipality

Lead UX Designer, onsite in Dubai
2020 – 2021

One home for a city's services for **3.5M residents**, organised by need instead of department. Arabic designed alongside English from the first wireframes; milestones signed off by senior officials.

Mphasis · Jet Airways

UX Designer, consumer apps
2015 – 2019

Web, iOS, Android and Apple Watch apps on a shared component library, all in production until the airline closed in 2019.

IBN AL QYM · ITAD · Wahab Studio

UX, UI & graphic design

2007 – 2015

Agency UI for client web platforms in Doha; earlier, web mockups, brand and print design.

SKILLS

Design

Design systems & tokens, AI-readable design systems, white-label theming, information architecture, interaction design, usability testing, bilingual / RTL

AI-assisted delivery

Design-to-code: Claude Code, Figma MCP · Agent frameworks: LangChain / LangGraph · Prototyping: Lovable

Design tools

Figma, FigJam, Storybook, Zeplin, Maze, Miro, Adobe XD

Technical

React / Next.js, TypeScript, HTML / CSS, design tokens

EDUCATION

IIT Roorkee

Mahatma Gandhi University
DeepLearning.AI

PG Certificate, Forward Deployed AI Engineering · 2026, in progress

Bachelor of Business Administration · Meghalaya, 2011 – 2013

Agentic AI · AI Agents in LangGraph
